МАТЕМАТИЧЕСКИЙ СБОРНИК
Том 133 (175) (1987), вв. 1–4
MATHEMATICS OF THE USSR—SBORNIK
Volume 61, Numbers 1–2, 1988

AUTHOR INDEX

Ararktsyan, B. G. *Asymptotically almost periodic solutions of some linear evolution equations* 1

Arnautov, V. I. *On the extension of the ring topology of a σ-bounded field to a simple transcendental extension of the field* 271

Borisenko, A. A. *On extremal properties of compact parabolic surfaces in a Riemannian space* 113

Chigogidze, A. Ch. *Compacta lying in the n-dimensional universal Menger compactum and having homeomorphic complements in it* 471

Chueshov, I. D. *Finite dimensionality of an attractor in some problems of nonlinear shell theory* 411

Egorov, I. E. *Analyticity of solutions of singular elliptic equations* 147

Gekhtman, M. M. *On the asymptotic behavior of the normalized eigenfunctions of the Sturm-Liouville problem on a finite interval* 185

Ivanov, N. V. *Projective structures, flat bundles, and Kähler metrics on moduli spaces* 211

Ivanov, S. A. *Best approximations by rational vector-valued functions in Hardy spaces* 137

Kalashnikov, A. S. *On some nonlinear systems describing the dynamics of competing biological species* 9

Kashu, A. I. *On localizations in Morita contexts* 129

Krasauskas, R. L., Lapin, S. V. and Solov'ev, Yu. P. *Dihedral homology and cohomology. Basic notions and constructions* 23

Kuz'min, Yu. V. *On the differentials in the spectral sequence of a group extension* 49

Lapin, S. V. See Krasauskas, R. L.

Lukomskiĭ, S. F. *Necessary conditions for sets of uniqueness of Walsh series with gaps* 461

Markov, P. E. *Infinitesimal higher order bendings of multidimensional surfaces in spaces of constant curvature* 65

Markus, A. S. and Matsaev, V. I. *On the basis property for a certain part of the eigenvectors and associated vectors of a selfadjoint operator pencil* 289

Matsaev, V. I. See Markus, A. S.

Mukminov, F. Kh. and Sokolov, V. V. *Integrable evolution equations with constraints* 389

Nadirashvili, N. S. *Multiple eigenvalues of the Laplace operator* 225
Paneyakh, B. P. *Some boundary value problems for elliptic equations, and the Lie algebras connected with them.* II 495
Parfenov, O. G. *Singular numbers of a weighted convolution operator*..... 309
Pekarskiĭ, A. A. *Tchebycheff rational approximation in the disk, on the circle, and on a closed interval* 87
Plakhotnik, V. V. *Classification of matriz idempotents over a subalgebra of $K[x]$ generated by monomials*..... 201
Polyakov, P. L. *Zeros of holomorphic functions of finite order in the polydisk*.... 103
Pomel'nikov, Yu. V. *Boundary uniqueness theorems for meromorphic functions*.. 321
Premet, A. A. *Weights of infinitesimally irreducible representations of Chevalley groups over a field of prime characteristic* 167
Romanovskiĭ, R. K. *Exponentially splittable hyperbolic systems with two independent variables* 335
Sapir, M. V. *Inherently nonfinitely based finite semigroups* 155
Semenov, V. I. *Integral representation of the trace on the sphere of a certain class of vector fields, and uniform estimates of stability for quasiconformal mappings of the ball*..... 239
Shelepov, V. Yu. *On boundary properties of solutions of elliptic equations in multidimensional domains representable by means of the difference of convex functions* 437
Sidel'nikov, V. M. *On normal bases of a finite field*..... 485
Slin'ko, A. M. *Nonassociative topological bimodules* 259
Smirnov, A. O. *A matrix analogue of Appell's theorem and reductions of multidimensional Riemann theta-functions* 379
Sokolov, V. V. See Mukminov, F. Kh.
Solov'ev, Yu. P. See Krasauskas, R. L.
Tarkhanov, N. N. *Uniform approximation by solutions of elliptic systems*..... 351
Tersenov, S. A. *On boundary value problems for a class of ultraparabolic equations, and their applications*..... 529
Tsikh, A. K. *Weakly holomorphic functions on complete intersections, and their holomorphic extension* 421
